Reliability & efficiency down to a science.

You paid for 140 Watts. Get your money's worth with Genasun. With the Genasun GV-10 MPPT controller, continuous power is yours for the taking. The only 10.5A 140W MPPT solar charge controller on the market today, the GV-10 extracts more power from any given panel than a PWM controller. And though PWMs may offer a lower controller cost, Genasun MPPT controller delivers more power – reducing the cost per watt by 10-30% and giving you more bang for your buck.

GV-10 10.5A @ 12V MPPT 140W

Take advantage of Genasun's advanced MPPT technology and

enjoy more reliable power from smaller panels.

- 98% peak efficiency
 - Built-in fuse •
- Excellent low-light performance
 - Ultra-fast true MPP Tracking
 - Compact for easy installation
 - No fans. No relays

Typical power gains from Genasun MPPT controllers vs the best PWM controllers available
